

*Grey Area Theater
June 20th, 2018*

*VIP Reception 5:30-6:30
Livability Awards 6:30-9:30*

Help honor San Francisco's most dedicated livability advocates who work at the intersection of land-use, environment, public health, and social equity in the Bay Area by sponsoring the 2018 Livability Awards.

With an expected attendance of 300 movers and shakers from the public, nonprofit, and private sectors, the Livability Awards is a great way to highlight your organization's civic spirit and network with the region's political, government, and business leadership.

All contributions directly support Livable City, a 501(c)(3) non-profit, and are tax deductible to the extent allowed by law.

Livable City

MISSION // We work to create a San Francisco of great streets and complete neighborhoods, where walking, bicycling, and transit are the best choices for most trips, where public spaces are beautiful, well-designed, and well-maintained, and where housing is more plentiful and more affordable.

Campaigns

Livable Neighborhoods

Our Livable Neighborhoods campaign helps foster walkable, diverse, healthy, and green neighborhoods. San Francisco is in its worst-ever housing affordability crisis, and we are working to preserve rental housing, meet housing needs at all levels of affordability, and allow the conversion of garages to housing and neighborhood-serving small businesses. We're also working to preserve art spaces and artists housing.

Complete Streets

We are working to make San Francisco's streets – 25% of the City's land area – safer, greener, and more convivial. We support greater walkability, a citywide bicycle network, and transit priority to make Muni faster and more reliable. We're working for more street trees, for buildings that activate and engage the sidewalks, and to reduce the impact of driveways and utilities on walkability.

Transit

We're working to improve the timeliness, reliability, safety, and accessibility of public transit in San Francisco. We are advocating for investments in transit capacity to relieve overcrowding and accommodate growing transit ridership. We are working to electrify Caltrain, bring it Downtown, and transform it into a fast, frequent regional metro service.

Green Open Space

We are working to create a citywide greenway network that connects neighborhoods to our waterfront and hilltop open spaces, and serves as green infrastructure for recreation, open space, habitat, and sustainable water management. We are also working to expand street parks, open space in new development, and community gardens across the city.
